

Main arena Wheelchair Access

Please follow the Blue entry route and continue round to the area marked with the red box on the map below. Access is slight sloped upwards. The paved area is raised above the level of the main arena floor and there is also bench seating.

Of course if your wheelchair is capable of going on the grass you are more than welcome to take it into the main arena but the paved area provides a hard, grass free area to watch the main stage from if required. There are two large screens either side of the main stage so you will be able to see what is going on.

Main Arena Quiet Viewing Zone

We are hoping to provide a quiet viewing area in the Hub for those with sensory needs that are not comfortable being in large crowds or loud places during the opening and closing ceremonies. This will be a room with a television / projector set up streaming a live view from the main stage. If you require use of this space please head to the hub and ask to be directed to the quiet zone. All young people using this space must be accompanied by adults in line with normal ratios as this space will not be manned.

Main Arena BSL Interpreter

During the opening and closing ceremonies we have arranged for a British Sign Language Interpreter to translate what is happening on the main stage. We hope to show this on the stage screens but if you have a specific need for this please contact info@shirejam.org.uk to let us know so we can make sure you are in sight of the interpreter.
